

Debit POS Terminal – PFT 500

PFT 500 Floor Model

Peregrin's PFT 500 is an advanced, PIN-based debit/point-of-sale (POS) terminal ideally suited for convenient stores, fast-food restaurants, sports bars and similar retail locations. The PFT 500 terminal has an intuitive ATM-style interface and bold menu prompts. No training is required for consumers to independently, and privately, use the PFT 500 terminal. The exceptionally fast modem and built-in high speed printer, total transaction times are short. The thermal printer requires no ribbons eliminating this expense and substantially reducing mechanical malfunctions. The menu-driven software of the PFT 500 terminal allows users to access all features of the terminal easily and quickly.

The PFT 500 terminal is customized site-by-site and is uniquely suited for merchants with limited counter-top, wall and floor space. This terminal is very accommodating to locations that do not wish to invest in a cash ATM or deal with the cost and risks associated with cash servicing.

The PFT 500 terminal is an ideal companion terminal for cash ATMs.

This allows consumers to select the method of withdrawing funds from their bank account, as well as, *ensuring each location that there will always be a financial terminal available.*
