

The Northwest's Premier ATM Vendor brings you

SEGURACASH™

The latest innovation in cash logistics products & services
Turns an ATM into a Time-Release Safe!

For merchants who need fast, simple, yet controlled access to cash—whether for COD payments, lottery winners, or any cash payouts—SeguraCash is the answer. Using a standard ATM and Columbus Data Services' processing, SeguraCash allows easy, quick and secure access to the ATM's cash with total control and real-time monitoring.

- **Use the ATM you already have!** With the patented SeguraCash system, there is no \$4-5,000 additional equipment cost or ongoing operational expenses. The only up-front cost is the minimal charge for registration and setup. SeguraCash is a true pay-as-you go service; with only a small fee per cash-dispense.

- **No more tube-loading:** If you use your ATM in place of a time-release safe, you don't have to worry about the time-consuming and error-prone chore of loading tubes with cash.

- **More accurate withdrawal:** Unlike time release safes, the money dispensed can be within \$19.99 of the exact amount needed, helping to limit the money in a cash drawer.

- **Faster access to cash:** A SeguraCash enabled ATM can dispense \$1,000 in less than 40 seconds from initial card swipe to last bill dispensed.

- **Controlled access:** A merchant employee that needs access to cash is issued a SeguraCash mag-stripe card with a PIN. This card/PIN can be individually programmed to limit the amount of cash that can be dispensed in a single transaction (assuming \$20 bills, up to \$1,000), the total amount that can be dispensed per transaction, per day, plus a time-delay of one to ten minutes between dispenses.

Real-Time ATM Tracking: All withdrawal transactions, traditional and SeguraCash, can be monitored in real time from any Internet device, through Columbus Data Services' website—from

your head office or from a smart phone on Waikiki Beach. A merchant does not have to go to the ATM's location to determine transaction histories and account balances.

A SeguraCash card dispense is a "closed loop" transaction. No card or bank networks are contacted—no foreign ATM fees or interchange fees. And the SeguraCash card can only be used in your location, and not in any other ATM.
